

## Discover our enhanced and integrated online sports administration solutions!

## Sports management simplified - online all the time.

### Simplified Registration

Easy, user friendly and complete online registration for your sports club - sailing club, curling club, swim club, hockey club or any other type of sports organization. Once registered, there is no need to re-enter personal information for future registrations. Options to offer scheduled or full payments exist. Easy course registration using e-commerce shopping cart model provides for a great hassle-free customer experience.

### Self-Administration

While members/customers have the choice and convenience to enter information online, they also have the ability to update their account information if required. As a registrant, you get to pick to opt-out of email, add additional participants during the same session, choose other family members to register, review invoices or view your course registration at a later date, among other options. The choice is yours and best of all - it's easy to do!

### Online Payment

Allow existing and new members the convenience to pay 24/7/365. Use your current merchant service provider account for online payments or we can help set you up. All payments are processed on their hosted payment pages, ensuring compliance with online credit card payment regulations. You also have the option to provide promotional discounts. And best of all, registration fees go directly and securely into your organization's bank account.

### Fully Integrated

All functionality can be added to your current or new web site using your organization's existing branding. We add shopping cart support and database retrieval modules to your pages - your customers continue to browse familiar pages in known locations. Your data is stored in your database, on your web server, always under your control. Fully integrated solution allows information to be shared among all club portfolios.

### Secure and Reliable

Members and non-members registering on your website can be assured that their personal data is secure with password-protected personalized accounts, using one-way encryption for login credentials. All personal information is transmitted over industry-leading secure socket layer connections.

### Role-based Administration

Website, registration, and payment services can easily be managed and configured from a web based administration area. Create on-demand reports to generate useful registration and financial data for those in your organization. Read and write privileges to specific information can easily be assigned to different administrators as required.
